

# Quick-add Product Widget

Quickly build products and services, no matter the complexity

With the quick-add product widget from BillingPlatform, you can quickly and easily add products and services with point and click configuration.

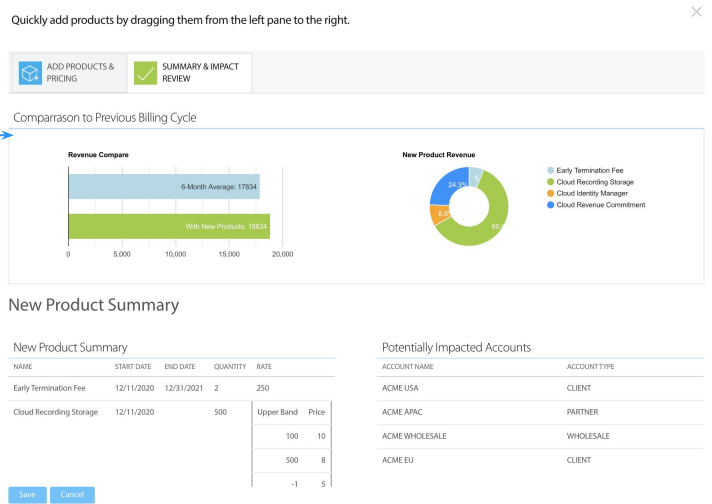

Quickly filter, drag, and drop products onto your customer's contracts or service plans and adjust pricing, quantity and service dates in seconds.

Configure search and filter criteria for large product catalogs to make your products easy to find with intuitive, type-ahead search.

Choose to expose pricing to child accounts across a deep account hierarchy or isolate pricing to the account you are on.

Validate your choices with predictive outcome and impact analysis built into a simple, yet powerful confirmation console to avoid mistakes.

Build, deliver and manage products and services with total control with the **Quick-add Product Widget** from BillingPlatform
